## MEMORANDA.

Trade.—The oversea imports during May were valued at £2,315,784, which shows an increase of £749,215, or nearly 48 per cent., as compared with the corresponding month of last year. The total for the five months was £10,719,569, an increase of £1,985,163, or over 22 per cent., over the corresponding figures for 1910. There were increases in most of the principal articles—apparel and soft goods, cordage and twines, metal manufactures, machines and machinery, and timber.

The oversea exports for May amounted to £1,728,681, being a decrease of £164,949, compared with the corresponding month of last year. For the five months there was a decrease in the oversea exports of £1,274,420, or nearly 10 per cent., as compared with last year.

Separating merchandise from gold, the exports of the former during the five months decreased by £1,336,769 and the latter increased by £62,349.

Imports at Sydney.—Excluding the value of the imports from State ports, the articles imported at the port of Sydney in May were valued at £2,938,388. The following is a summary of the imports during the month:—

	Weight.	Measurement.	Value.
Imports Oversea ,, Interstate ,, From State Ports	 tons. 44,752 19,413 120,766	tons. 72,804 20,356 12,765	£ 2,229,024 709,364 Not available
Transhipments— Oversea Interstate To State Ports	 9,828 23,122 3,725	7,101 4,810 5,340	,, ,,

A few special articles, denoted by number in the detailed table within, have been converted into weight or measurement, and are included in the above statement. During the five months ended May, 1911, the oversea imports were valued at £10,337,901, and the Interstate imports at £3,397,495, the total of the two being £13,735,396.

**Public Finances.**—The Public Accounts for May show that the net revenue for the month was £953,568, or £262,852 less than in May of last year. During the eleven months ended 31st May, the revenue was £12,555,008, being £208,116 less than the corresponding period of the last financial year.

Principal increases during the eleven months were— £

The only item to show a decrease of more than £8,000 was "Commonwealth Returns," which were £1,251,689 less than for the corresponding eleven months of last year.

The expenditure during May was £898,622, an increase of £137,595, as compared with May of last year. During the eleven months the expenditure was £12,875,418, being £779,774 more than in 1909–10.

Principal increases during the eleven	months	were-	- £
Business Undertakings			451,235
Government Departments		,	185,473
Interest Repayments			151,510

Sinking Fund and Redemption Payments show a decrease of £8,444. On the 31st May, 1911, the Consolidated Revenue Account was in credit to the amount of £531,916.

Agricultural Production.—The preliminary results of the final compilation of the crop returns show that the yield of wheat during the 1910-11 season was 28,064,047 bushels from 2,128,338 acres, equivalent to an average of 13·2 bushels to the acre, and was the second largest on record, being only exceeded by the yield for 1909-10 by about 500,000 bushels. The season generally was extremely good, as, in addition to wheat, the yields per acre of maize, oats, and hay were above the average. The area under all crops was 3,382,523 acres, an increase of 201,962 acres compared with the total cultivation for the previous year; but although the season was generally good, the average production per acre in all the leading grain and hay crops was not up to the high standard of 1909-10.

Dairying Production.—The dairying industry in 1910 again showed considerable expansion. The quantity of butter made was about 76,650,000 lb., the largest on record, and over 13,786,000 lb. more than during last year. The result is principally due to excellent returns in the North Coast districts. The production of cheese, bacon and hams also exhibited large increases.

Stock Returns.—The preliminary stock returns show the number of sheep in the State at the end of 1910 as 45,825,308, a decrease of 377,270 on the previous year's figures, the decrease being entirely in the number of those under 1 year of age. The number of horses was 650,594 (the highest on record), and of cattle 3,132,228, and of pigs 321,544, both showing increases of 104,501 and 83,695, respectively, on the figures of the previous year.

- Manufacturing Industries.—The returns relating to employment in mannfactories show that the number of hands increased by 8,009, the total number employed in 1910 being 99,711, of whom 75,409 were males and 24,302 females. Increases were general in most of the principal industries, the largest being in the clothing industry, and in establishments working in wood. There was also a general increase in the wages paid of about 12 per cent., the total for 1910 being £8,685,153, as against £7,665,125 in 1909. The average wages paid in 1910 were £87, as compared with £83 in 1909. Of the total wages paid in 1910, males received £7,724,991 and females £960,162, the average being for males £102 9s., and for females £39 10s. The plant and machinery in use were valued at £11,541,891, or £1,211,167 in excess of the figures for 1909; and the value of land and buildings used in connection with the factories was estimated at £7,251,697, or £666,631 more than in 1909.
- Gold Production.—The gold yield during May was 24,398 oz. crude, equal to 21,319 oz. fine, valued at £90,558. The value of gold produced during the five months was £319,898, and showed an increase of £2,848, as compared with the corresponding period of 1910.
- Prices.—The general index number for May was slightly above that of April, but was nearly 5 per cent. lower than for the corresponding month of last year. The index number for pastoral produce was 1,151, for metals 1,214, and for all articles 1,167. During the month, the prices of flour, sheep skins, lead, tin, and coal advanced; but wheat, tallow, leather, hides, and copper declined in value, other articles remaining at about the same level as those ruling in April.
- Meteorology.—During May the weather conditions were very favourable, and quite in contrast with those of the previous month. As the result of four rainstorms, beneficial falls were experienced throughout the whole State, more especially over the "Wheat Belt"; and the records show that over fully three-fourths of the total area the amounts were above the average. The north-eastern quarter of N.S.W. and the Metropolitan area were the least-favoured districts; but at many of the stations west of the Plains falls were recorded exceeding 3 inches. The temperature generally was low, with occasional warm days; towards the end of the month frosts were prevalent, and snow occurred on the Central and Southern tablelands.
- Land Selections. During May 120 new settlers applied for 55,682 acres; and 20,059 acres, representing 63 blocks, were set apart for residential settlement. Since the beginning of the year, the number of new settlers has been 569, and the area applied for 411,752 acres. The original area set apart for residential settlement since the 1st January has been 246,747 acres, representing 330 blocks.
- Vital Statistics—Sydney and Suburbs—May, 1911.—The Births registered numbered 1,648, equal to 31·32 per 1,000 of population; of the total, 838 were males and 810 females. The rate is very satisfactory, being the highest for the month of May since the year 1894.

The total Deaths numbered 593, namely, 298 males and 295 females, equal to a rate of 11·28 per 1,000 of population, being nearly 1 per cent. above the average mortality rate for the previous five years.

The Infantile mortality was 68 per 1,000 births, and, although higher than for May of 1910, was 23 per cent. below the average for the last decennium.
